

LB14 PARABOLIC ALUMINUM BAFFLE

1.4" DEEP WITH TRIMMABLE WIDTH

LB14 parabolic aluminum baffles are available as highly adaptable stock parts or can be manufactured to meet specific requirements. Stock parts feature cross blades either 2" (51mm) or 3" (76mm) on center and trimmable flanges that facilitate immediate shipment of parts meeting almost any dimensional requirement. These nonflammable aluminum baffles are 1.4" (35mm) deep to assure maximum luminance control. Each 4' part begins and ends with a half cell (1" or 1-1/2") so that the baffles can be butted end to end for a continuous appearance.

Cross Blades: 2" or 3" on center.
