RE: EU Directive 2011/65/EU – Restriction on the use of Hazardous Substances in Electrical Equipment

Dear To Whom It May Concern:

Please be advised that SLP products, as supplied, are in compliance with the applicable provisions of the EU Directive 2011/65/EU – (Restrictions on the use of Hazardous Substances) “ROHS.” Please be advised that this directive requires that the chemicals listed below, if used in electrical or electronic equipments, must not exceed the corresponding concentration limits of that chemical. We also certify that none of these chemicals are intentionally added to the formulation, nor is it part of our manufacturing process.

| Chemical | wt(ppm) |
|---------------------------------|----------------|
| Cadmium | 100 |
| Lead | 1000 |
| Mercury | 1000 |
| Chromium | 1000 |
| PBB | 1000 |
| PBDE | 1000 |
| Other poly brominated compounds | 1000 |

SLP has not run any analysis for concentration levels for ROHS components, but has relied on raw material suppliers for this information. Based upon supplier information, an analysis could possibly show trace amounts of these chemicals, but the concentration level would be far below the allowable concentration limit.

If there are questions, please feel free to contact me at 636-660-8116 or use my e-mail address at rkloeppe@slplighting.com for future inquiries.

Sincerely,
Rob Kloeppe
