

# CircLED with Direct Mount Remote Box *Standard Parts*

## Housing

- CLD-TCP-18LH  
(1 per Fixture)

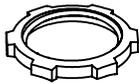

## Remote Box

- RB-NRL-16-BLK or  
RB-NRL-16-BLK-4X  
(1 per Fixture)

## Threaded Center Post

- CLD-CTR-PST  
(1 per Fixture)

## 3/4" Conduit Locknut

- SLP-SLN75  
(2 per Fixture)

## 1/2" Hub

- CT-DCB-50  
(1 per Fixture)

## Driver Bracket Screw

- CLD-SEMS-10-24  
(4 per Fixture)

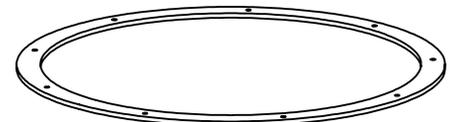

## Flat Lens Options

- CLD-P95-118-16.375 (Frosted Acrylic)  
Or
- CLD-SH-CA-118-16.375 (Clear Acrylic)  
Or
- CLD-TFK-LV3-118-16.375 (Frosted PC)  
Or
- CLD-TFK-LF-118-16.375 (Clear PC)  
(1 per Fixture)

## Flat Lens Gasket

- CLD-LENS-GSKT  
(1 per Fixture, for  
Flat Lens options only)

## Lens Ring

- CLD-LENS-RNG  
(1 per Fixture, for  
Flat Lens Options Only)

[NOTE: Drop Lens option  
also Available in Acrylic or PC.  
See next page for options/parts.]

## Lens Retainer Screw

- CLD-TLSCRW-832-375  
(9 per Fixture)

## #8 Thread Cutting Screw

- SLP-SCRW-TC8312  
(6 per Fixture)

## O-Ring

- SLP-ORING  
(1 per Fixture)

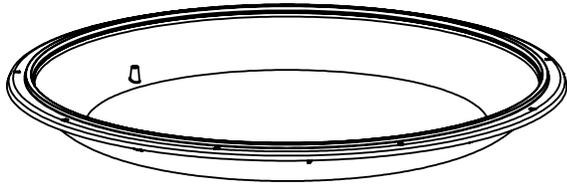

## End Plug

- SLP-ENDPLUG-B-75  
(1 per Fixture)

CLD-DMRB-AG 09/20

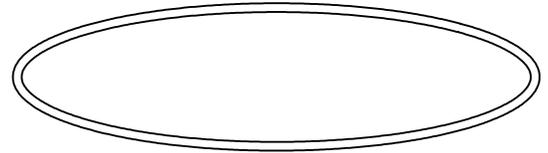

# CircLED with Direct Mount Remote Box *Optional* Parts

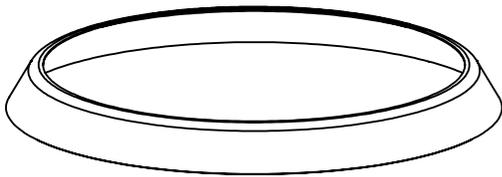

## Drop Lens Options

- CTR-LENS-18-ACR (Clear Acrylic)  
Or
- CTR-LENS-18-ACR-FR50 (Frosted Acrylic)  
Or
- CTR-LENS-18-PC (Clear PC)  
Or
- CTR-LENS-18-PC-FR50 (Frosted PC)  
(1 per Fixture)

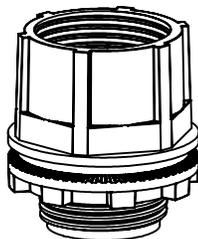

## Drop Lens Gasket

- CLD-DPLENS-GSKT  
(1 per Fixture, for  
**Drop Lens** Option Only)

## White Wall Diffuse Reflector

- CLD-WW-DR  
(1 per Fixture)

## 3/4" Hub

- CT-DCB-75  
(1 per Fixture)

[Use for Pendant Mount Option]

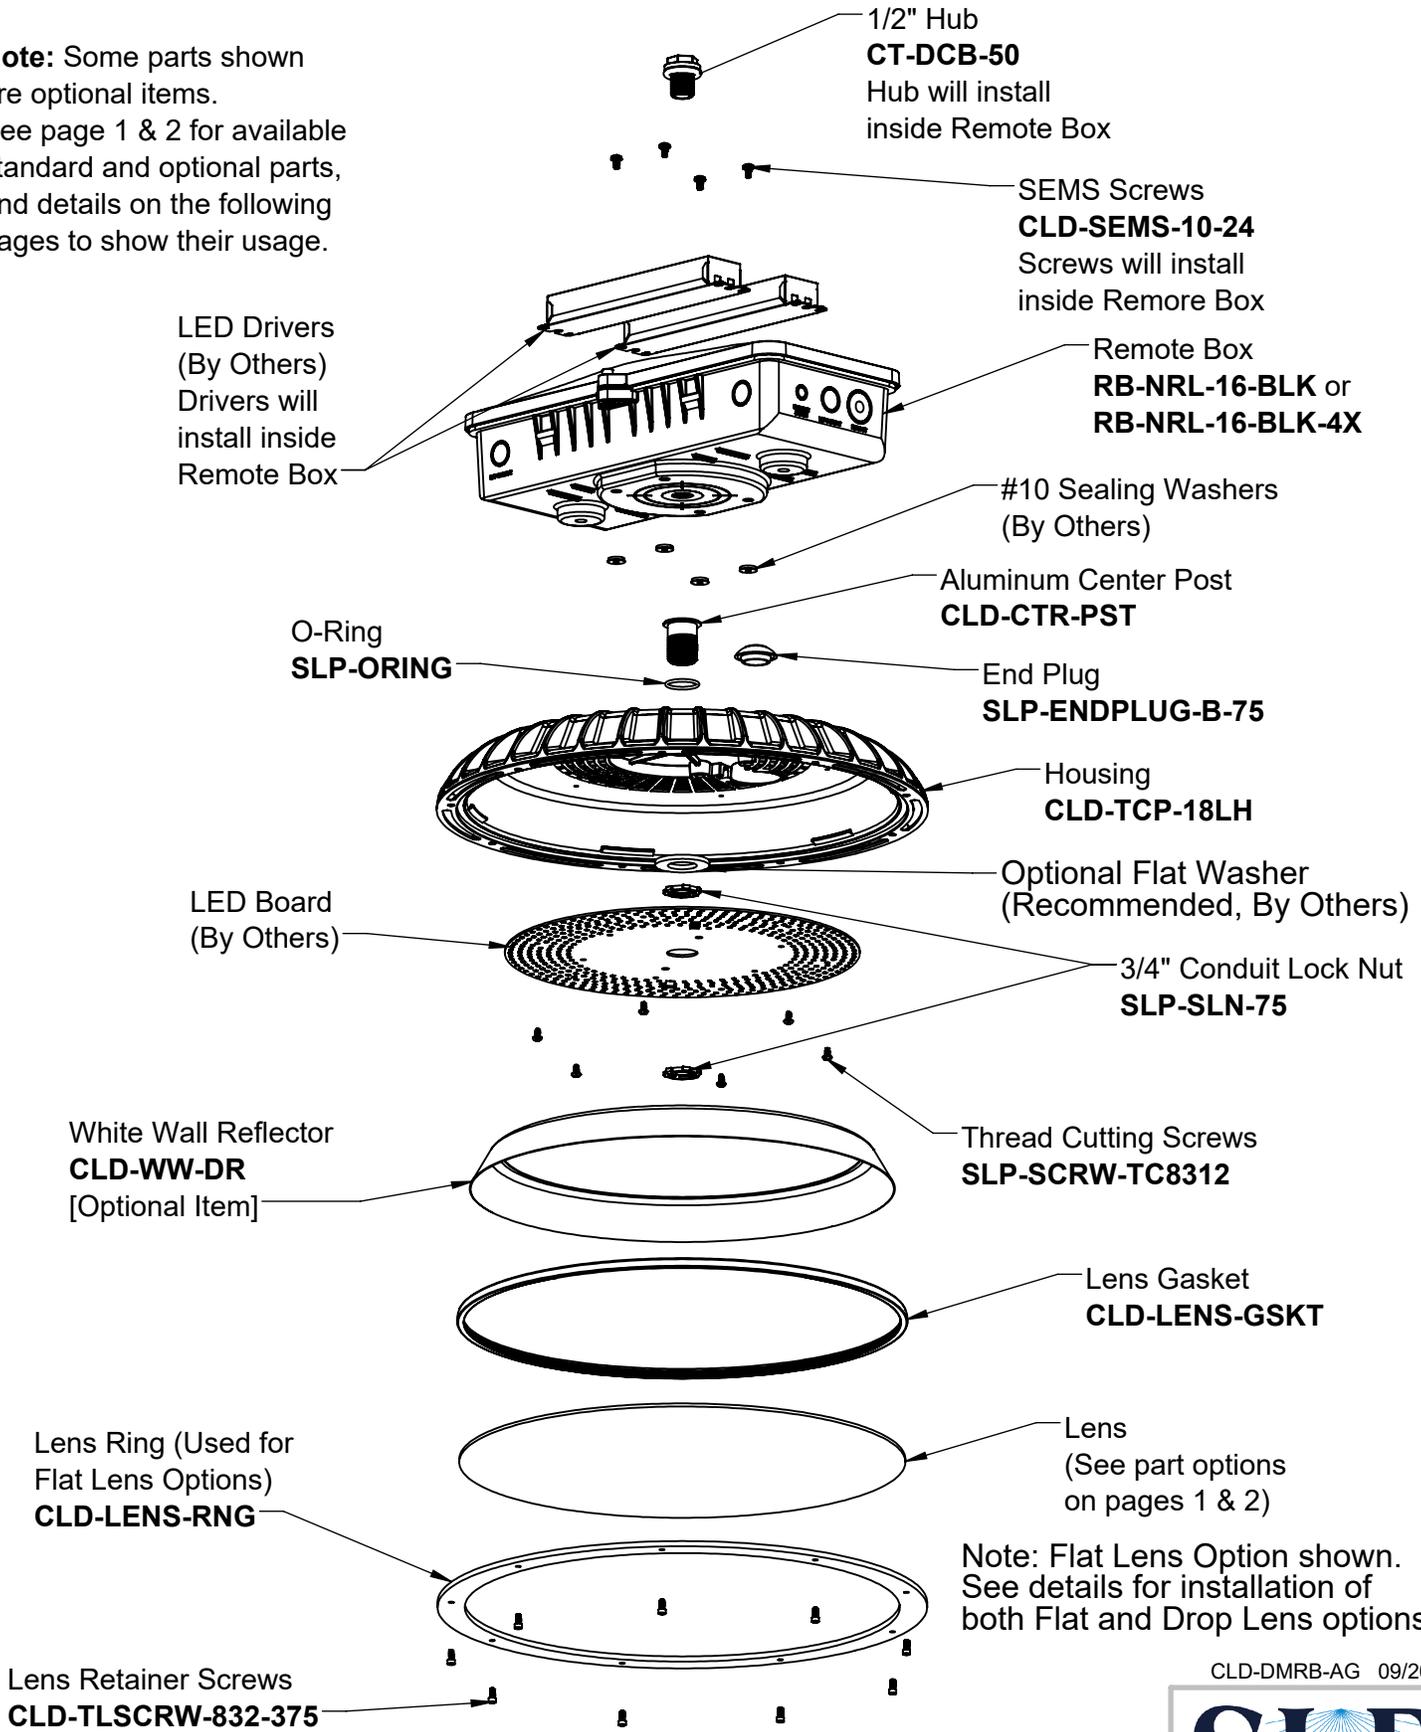

## Stainless Hook with 3/4" Conduit Locknut

- SLP-HOOK-SS-NH75 &  
SLP-SLN75  
(1 each per Fixture)

# CircLED with Direct Mount Remote Box Exploded View

**Note:** Some parts shown are optional items. See page 1 & 2 for available standard and optional parts, and details on the following pages to show their usage.

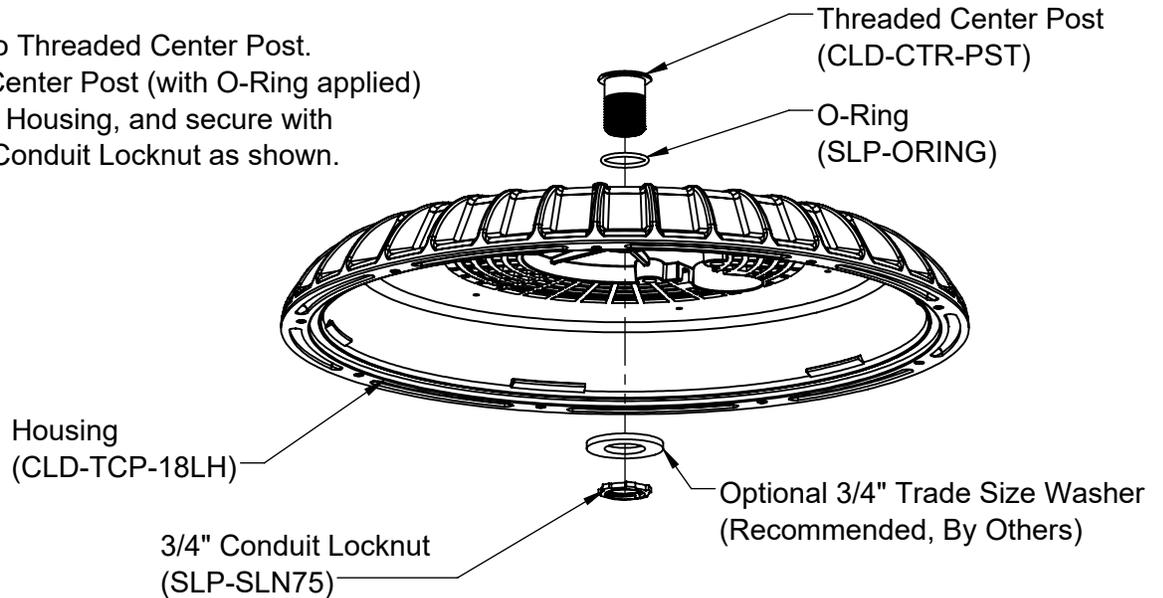

Note: Flat Lens Option shown. See details for installation of both Flat and Drop Lens options

CLD-DMRB-AG 09/20

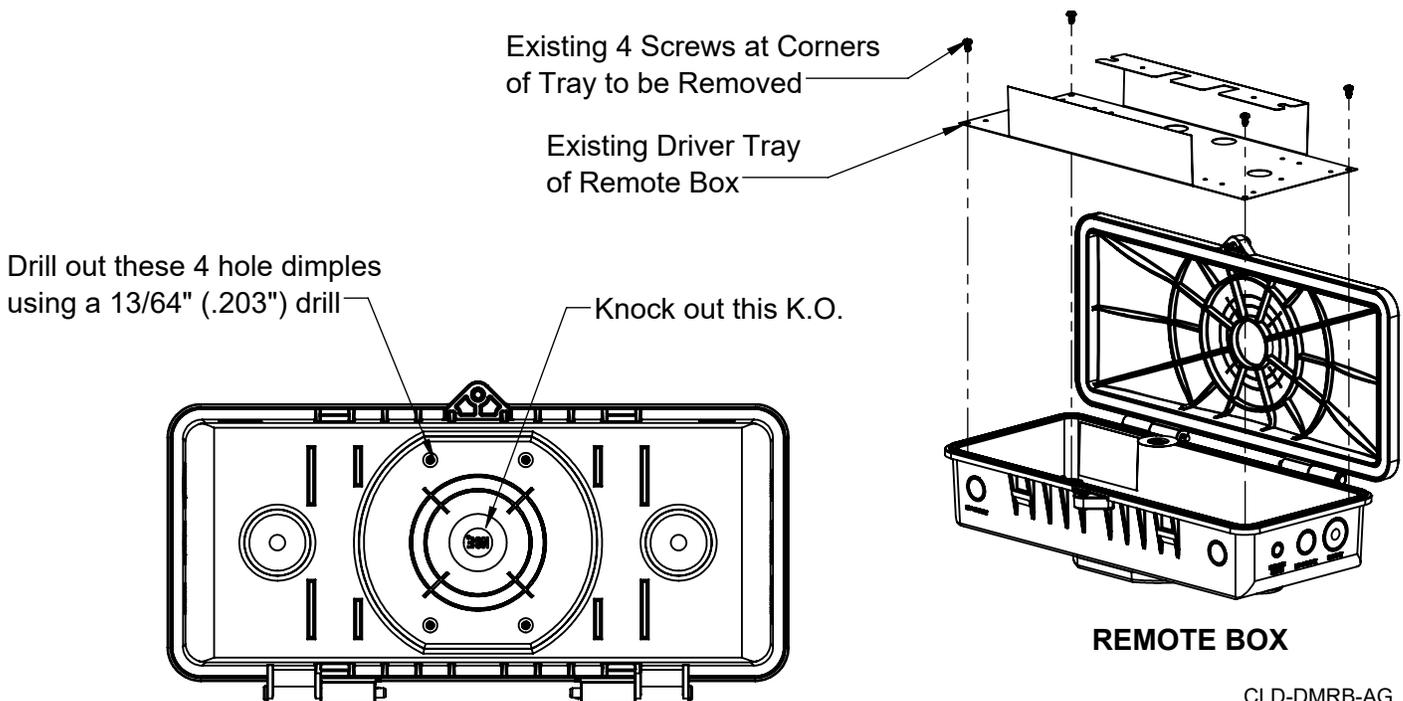

## STEP 1: Installing the Threaded Center Post to Housing

- 1.1) Install O-Ring onto Threaded Center Post.
- 1.2) Install Threaded Center Post (with O-Ring applied) into center hole of Housing, and secure with Washer and 3/4" Conduit Locknut as shown.

## STEP 2: Prepping Remote Box for Attachment to Housing

- 2.1) Remove the Driver Tray from the Remote Box, by removing the 4 screws at the corners of tray.
- 2.2) Drill out the four dimples on bottom of Remote Box, and also remove the K.O. from the center of box, using a small flat screwdriver and hammer. Clean out any shavings or debris from inside box.

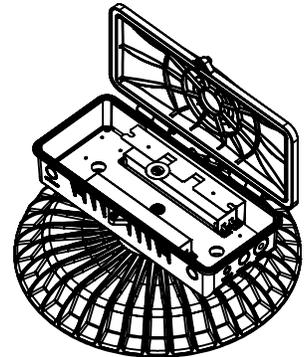

CLD-DMRB-AG 09/20

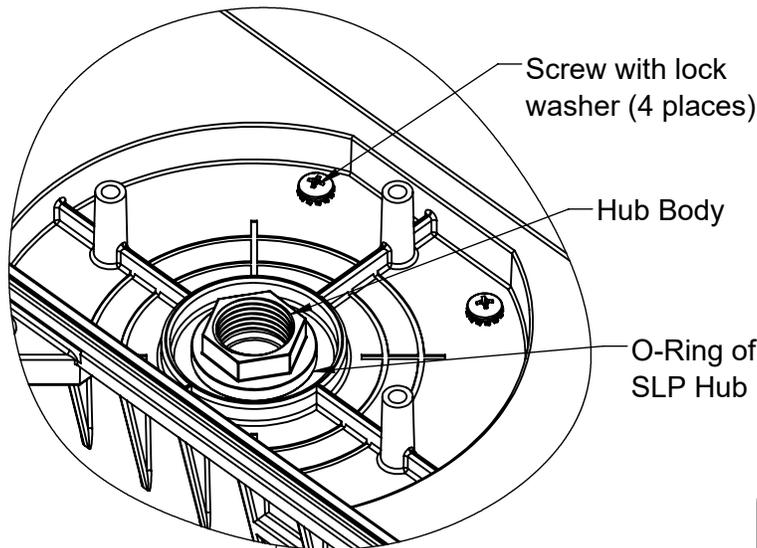

### STEP 3: Attaching Remote Box and Drivers to Housing

- 3.1) Insert the 4 screws with lockwashers attached, into the drilled out holes from the previous step, and install the sealing washers (not provided) onto the screw studs.
- 3.2) Screw the 4 screws into each of the threaded holes on top of housing, and tighten to 20 inch pounds.
- 3.3) Remove and discard the lock nut and plug from the 1/2" hub, and with hub's O-Ring on hub, screw the hub into the Threaded Center Post (already installed) on housing. Tighten to 20 inch pounds.
- 3.4) Re-install Driver Tray onto Remote Box, using the 4 screws removed from previous step.
- 3.5) Install Drivers (not provided) onto Driver Tray, using fasteners (not provided). Note that drivers may be pre-installed on Driver Tray before Driver Tray is re-attached to Remote Box. Several hole sets are on Driver Tray, that accommodate many existing driver footprints. Various K.O. are available for running input cord out of box. Use liquid tight cord grips for wet listed fixtures.
- 3.6) Install End Plug onto unused housing hole.

## STEP 4: Installing LED Array to Housing

**BOTTOM VIEW OF HOUSING**

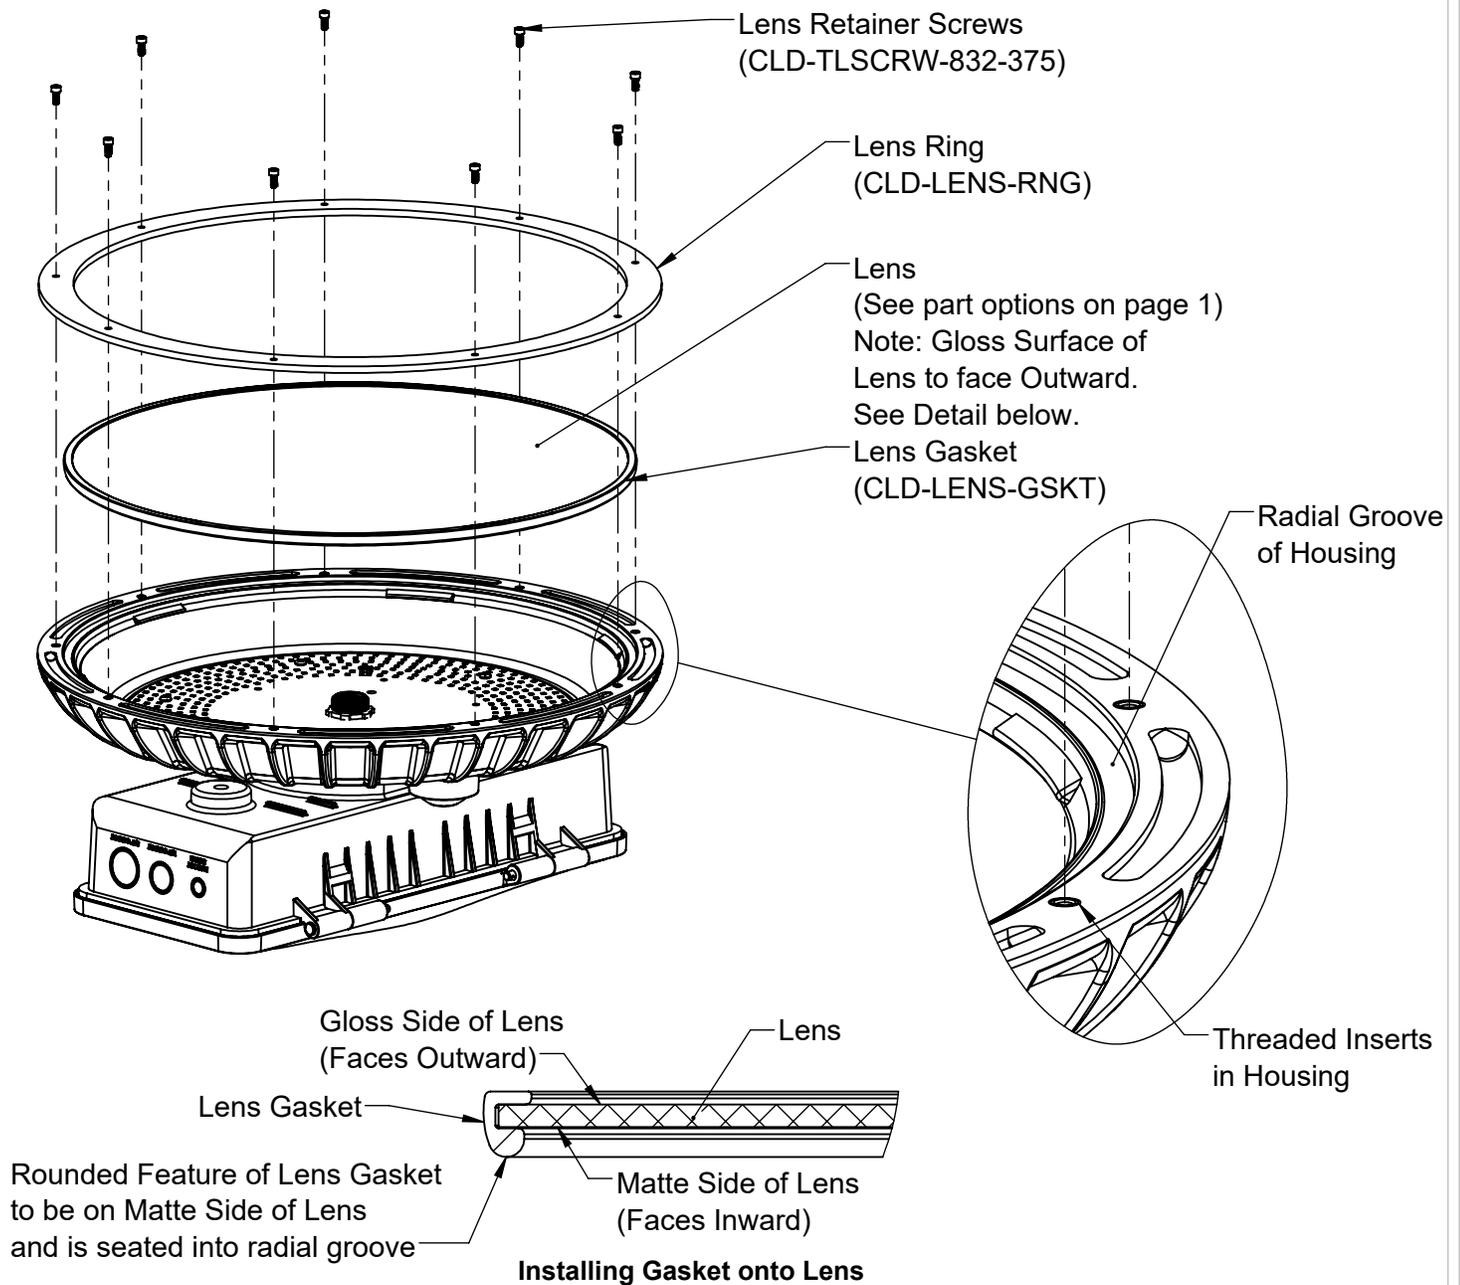

- 4.1) For an LED board similar as shown above, align center hole of board to Threaded Center Post (already installed), and secure with Locknut. Use #8 Thread Cutting Screws to secure the Array board to the six holes in housing. **Recommended maximum torque for screws is 6 in/lbs. Do not overtighten or use screws longer than required.** For a 2mm (.079") thick LED Board, a maximum length of 5/16" (.313") screws to be used.
- 4.2) Make wire connections from Driver output to connectors of LED Array. Output wires can be ran into the housing from the Threaded Center Post.
- 4.3) Using a 5mm hex key, close and fully tighten Remote Box Lid.
- 4.4) Install optional White Wall Diffuse Reflector into housing by simply inserting into bottom of housing. Verify that Reflector is fully seated above the 6 retainer tabs of housing.

## STEP 5a: Installing *Flat Lens* and Lens Ring (See Step 5b for *Drop Lens* Install)

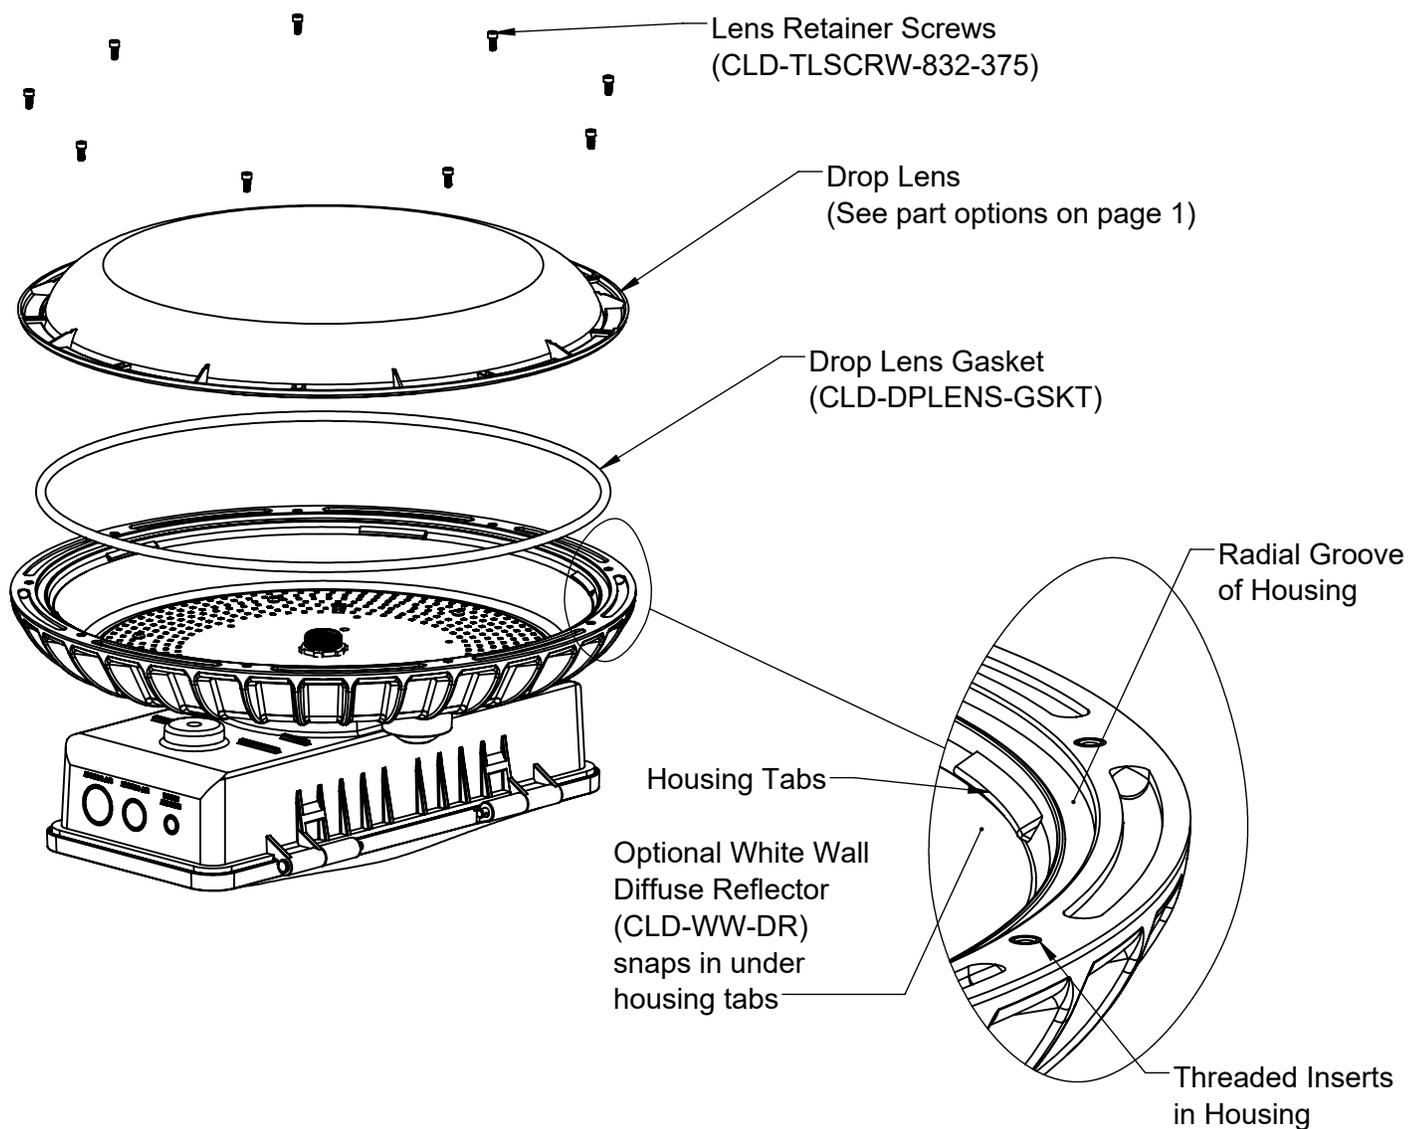

- 5.1a) Turn the fixture over with bottom side facing up. Remove the backing paper/film from both sides of lens.
- 5.2a) Install Lens Gasket onto Lens, by stretching and fitting gasket over the outer perimeter of lens. Note that the side of gasket with the rounded feature must be installed onto the Matte side of Lens, as shown in the details.
- 5.3a) With fixture still upside down, install Lens with Lens Gasket into cavity of housing. When installed properly, Lens and Lens Gasket will seat inside housing, with rounded feature of gasket inside the radial groove of housing.
- 5.4a) Align holes of Shroud Ring to the Threaded Inserts already installed in housing, and secure with 9 Lens Retainer Screws. **Recommended screw torque is 15 in/lbs.** Do not overtighten. Note: Lens Retainer Screws require a 9/64" hex key.

CLD-DMRB-AG 09/20

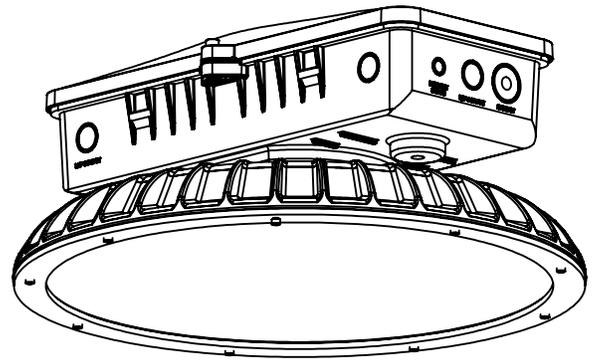

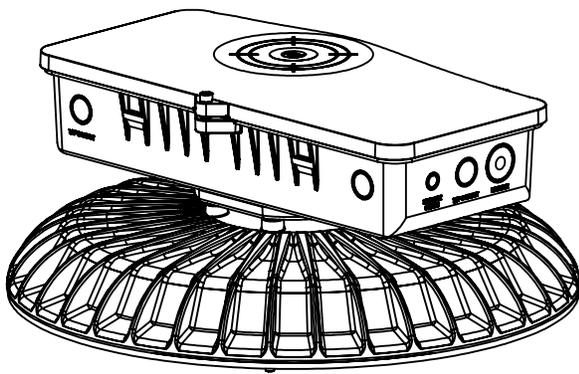

## STEP 5b: Installing *Drop Lens* (See Step 5a for *Flat Lens* install)

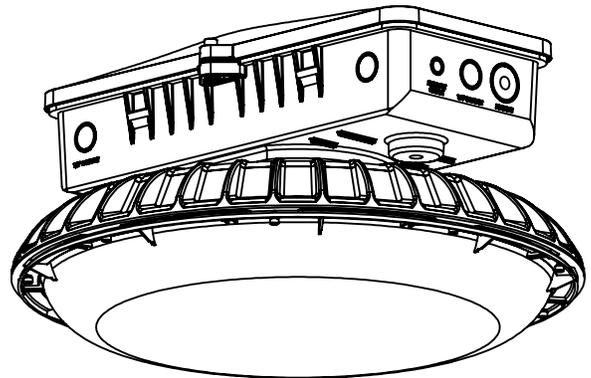

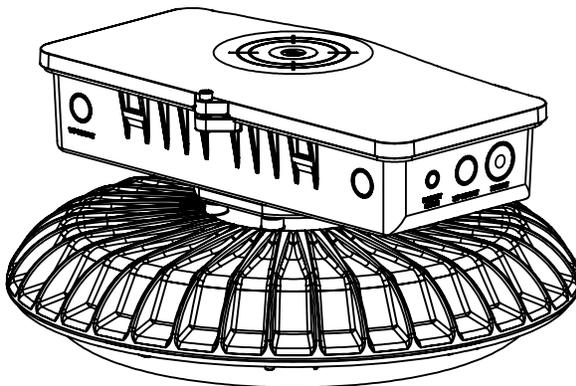

- 5.1b) Turn the fixture over with bottom side facing up.
- 5.2b) Install Drop Lens Gasket into radial groove of housing.
- 5.3b) With fixture still upside down, align holes of Drop Lens to the Threaded Inserts already installed in housing, and secure with 9 Lens Retainer Screws. **Recommended screw torque is 15 in/lbs.** Do not overtighten. Note: Lens Retainer Screws require a 9/64" hex key.
